English · *Intermediate level*

TECHNICAL SKILLS AND COMPETENCES

I have experience in web design, development and maintenance. I use PHP with the Symfony framework to build complex web projects, in order to efficiently implement the required features and ensure the reliability of the software.
Furthermore, I have acquired skills in Golang which I use for the creation of scalable and performing RESTful and web services.
Through the Agile methodology (Scrum) I learned to manage the software development process effectively, collaboratively and with a results-oriented approach.
